## RMMM Risk Analysis

<b><u>Risk</u></b>	<b><u>Probability</u></b>	<b><u>Effects</u></b>
The database in the system cannot process as many transactions as expected;	Moderate;	Tolerable
The time required to develop the software is underestimated;	High;	Serious
HSU software cannot be integrated;	Moderate;	Tolerable
Customers fail to understand or use the App;	Moderate;	Serious
Required training for staff is not available;	Low;	Insignificant
Rate of defect/bug/error repair is underestimated;	Moderate;	Serious
Size of software is underestimated;	Moderate;	Tolerable
Code generated is inefficient;	Moderate;	Serious
Would user info be displayed in database if user moves from one spot to another if they have paid for both;	Moderate;	Tolerable
User paying for meter before it is occupied;	Moderate;	Serious
Code reader(sticker) on meter destroyed by outside source;	Moderate;	Serious
User not having access to internet;	Low;	Tolerable
User getting a ticket even though they have paid for the spot through app;	Low;	Serious
Inability for app to dynamically create new points for meters;	Low;	Serious
Geo-locations not lining up in map view;	Moderate;	Serious
Site is only desktop or mobile view friendly;	Low;	Tolerable
User forgetting account info trying to create a new account;	Moderate;	Tolerable
Security personnel logging in doesn't send them to admin page;	Low;	Serious
User bypassing payment requirement	Low	Serious
